#### **DETAILED ACTION**

Applicant's election with traverse of Group-II, Claims 6-17 in the reply filed on 11/13/2006 is acknowledged. The traversal is on the ground(s) that it would not be a serious burden to search both the groups. This is not found persuasive because the limitations of both the groups are different with distinctly different designs for the reasons cited in the last office action.

The requirement is still deemed proper and is therefore made FINAL.

The examiner has considered the IDS filed 1/22/2004, 04/13/2004, 07/06/2004 and 11/09/2006.

#### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: Claims 6-17 are allowed.

The documents cited by the JPO and EPO were considered, and they neither teach nor fairly suggest either singly or in combination the applicant's signal switching device having the Applicant's specific configuration of two variable impedance units. Koepff et al (US 5,105,200) teach a superconducting antenna having superconducting portions both in serial and parallel configurations (Fig-3), but fails to teach or suggestive of the Applicant's switch. Gallagher et al teach a reduced cross-sectional microbridge comprising a HTS, but fails to teach or suggestive of Applicant's switch (Fig-4-5, Abstract, Cl-3, Ln 47-56). Narahashi et al teach a wireless receiving unit (Abstract of US 6,963,758, for WO 02/27962), but fails to teach or suggestive of the applicant's switch.

#### ***Conclusion***

This application is in condition for allowance except for the following formal matters:

The Non-elected invention-I, Claims 1-5 need to be cancelled.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
